

Eurobotics LLM Cost / Intelligence Map

AA Intelligence Index v4.3 x non-promotional OpenRouter pricing

Eurobotics methodology v1.4: Y = Artificial Analysis Intelligence Index v4.3. X = AA measured total evaluation cost repriced to current non-promotional OpenRouter tariffs via the ratio of 7:2:1 blended prices (70% cache-read / 20% input / 10% output). This is a reproducible estimate, not an exact OpenRouter invoice. No temporary promotional prices are used in the baseline (Sol audited and repriced to list 4/20). GPT effort levels (Low to Max) move both vertically and horizontally because higher effort consumes more tokens.

Disclaimer: For informational use only - do not use for budgeting. Pricing and benchmark data change frequently; verify current prices and model capability yourself. Eurobotics.org provides this information with no warranty. You are responsible for checking your own pricing and model intelligence requirements.
