

Eurobotics LLM Cost / Intelligence Map

AA Intelligence Index v4.3 series x non-promotional OpenRouter pricing

Eurobotics methodology v1.6: Y = AA Intelligence Index v4.3 series (current v4.3.2). X = AA measured total evaluation cost repriced to current non-promotional OpenRouter tariffs via the ratio of 7:2:1 blended prices (70% cache-read / 20% input / 10% output). This is a reproducible estimate, not an exact OpenRouter invoice.

(*) GPT-5.6 Sol uses its undiscounted 4/20 list tariff; OpenRouter still shows a 50% promotion. GPT effort levels move both vertically and horizontally as effort increases.

Disclaimer: For informational use only - do not use for budgeting. Pricing and benchmark data change frequently; verify current prices and model capability yourself. Eurobotics.org provides this information with no warranty. You are responsible for checking your own pricing and model intelligence requirements.
